

MLC SERVICES - 02

ESG End to End Solution

Connect environmental, social and governance priorities with data, reporting and business decisions.

WHAT WE COVER

Benchmarking & priorities — Compare organizational priorities with relevant peer and industry practices.

Data & reporting — Organize ESG information across sources to support analysis and reporting requirements.

Supply chain & emissions — Explore supplier assessment and carbon-accounting support within the agreed project scope.

What is ESG?

The ESG framework helps identify, organize, analyze, prioritize, and accordingly guide decisions on various business risks.

Why ESG is Required for any Organization

ESG is important because it helps identify and manage risks, improve social responsibility, enhance long-term sustainability, meet stakeholder expectations, navigate and comply with regulations, and improve access to capital.

Consumer Behavior

- Compliance Reporting
- Investment & Funds

ML Consultancy advises organisations on environmental, social and governance reporting — helping you decide what to measure, gather it reliably, and present it against the framework your stakeholders expect.

Services We Provide Peer Benchmarking

Benchmarking your disclosures against comparable organisations in your sector.

Supplier Assessment

Embracing Regulatory Adaptation and Decarbonization Strategies for Enhanced Supplier Assessment.

Advanced Carbon Accounting

Integrates global emissions standards and protocols, ensuring compliance with various regulations.

Reporting support

Guidance on what each framework asks for and how your data should answer it.

Multi Framework Automated Reporting

Reporting aligned to the framework you are held to – BRSR, GRI, SASB, TCFD, SEC or CSRD.

- 1.Integrate and manage extensive ESG data efficiently and accurately from diverse sources.
- 2.Leverage robust analytical tools for insightful ESG data interpretation and dynamic visual reporting.
- 3.Align ESG reporting with global standards and provide detailed, real-time insights for stakeholders.
- 4.Address New ESG themes like biodiversity and nature-related financial risks in reporting.
- 5.Put a repeatable collection process behind the numbers, so each reporting period is comparable with the last.
- 6.Tackle the complexities of reporting Scope 3 emissions in the supply chain with evidence backed data collection.

FAQ

What is the ESG framework used for? A framework for identifying, analysing and prioritising environmental, social and governance risks, and guiding business decisions on them.

Why does ESG matter to an organisation? It helps manage risk, improve social responsibility and long-term sustainability, meet stakeholder and regulatory expectations, and improve access to capital.

Which reporting frameworks does MLC support? Reporting aligned to the framework you are held to, including BRSR, GRI, SASB, TCFD, SEC and CSRD.

What ESG services does MLC provide? Peer benchmarking, supplier assessment, carbon accounting, reporting support and multi-framework reporting, including Scope 3 supply-chain emissions.

How does MLC keep ESG data comparable over time? By putting a repeatable collection process behind the numbers, so each reporting period can be compared with the last.
