MLC Fire System Services

Maintenance, refilling and testing enquiries for existing fire equipment and systems.

WHAT WE COVER

Refilling services — Discuss extinguisher types, inventory and servicing requirements.

Maintenance support — Explore AMC scope for extinguishers, hydrants, detection and suppression systems.

Testing & records — Review hydrostatic-testing enquiries and equipment service records.

What is the frequency of fire extinguisher refilling as per IS 2190?

Once every year, According to the guidelines set by the Bureau of Indian Standards (BIS), specifically IS 2190, the recommended frequency for refilling fire extinguishers is once every year. This standard is crucial to ensure the optimal functioning and reliability of these life-saving devices.

The following Fire Extinguishers refilling services are available in MLC Fire System Services

Supporting in getting Fire NOC for new organizations and any other licenses required by Local Fire Authorities

HPT of Fire Extinguishers, Hydrostatic testing is a way to test the fire extinguisher tank for leaks and overall strength. The portable fire extinguishers must be tested periodically to ensure it's safety and reliability. In addition to annual inspections, portable fire extinguishers must be disassembled and hydrostatically tested periodically.

Legal requirement of HPT of Fire Extinguishers in India.
