Supplier Qualification Audit

Supplier evaluations focused on capabilities, facilities and alignment with your requirements.

WHAT WE COVER

Supplier background — Review supplier information and the context of the proposed business relationship.

Facility & capability — Evaluate relevant facilities, processes and operational capabilities.

Requirement alignment — Structure the review around the products, services and criteria important to your organization.

What is a Supplier Qualification Audit?

A Supplier Qualification Audit is an essential step in securing your supply chain. It helps you select reliable suppliers who can meet your requirements, whether you're working with new partners or globally established manufacturers.

MLC auditors conduct on-site evaluations to assess your supplier's capabilities, facilities, production processes, workforce, and more. This independent assessment ensures you're working with a legitimate partner.

Each audit is customized to your specific needs, combining your requirements with our extensive Supplier Qualification Audit checklist of over 50 checkpoints.

- Why Do You Need a Supplier Verification Audit?
- Avoid Scams
- Verify Supplier Information
- Save Time & Early Risk Assessment
- Select the Right Supplier

- Verify Supplier Legitimacy

FAQ

What does a Supplier Qualification Audit involve? An on-site evaluation of a supplier's capabilities, facilities, production processes and workforce, to help you choose reliable suppliers and secure your supply chain.

Why audit a supplier before working with them? To avoid scams, verify the supplier's information and legitimacy, assess risk early and select the right partner.

Is the audit tailored? Yes. Each audit combines your specific requirements with MLC's supplier qualification checklist of more than 50 checkpoints.

Useful details to share when you enquire

- Supplier identity and location
- Products or services being sourced
- Your qualification criteria and priority concerns
